ARSADI – Fade In Fade Out

In cold pouring rain
You've walked on endless paths
To wash away old stains
But they will still belong to the aftermath

Now fireworks shine bright
So sing along and cheer!
Just like a starry night
But they won't guide your steps though the sight is clear

Most days you feel all alone
So you trade yourself for admiration
You gotta fade in and fade out oh

In sparkling halls of gold
You dance with paper shields
Get fame for friends you sold
And you bow for the wind like the wheat in fields

Life slowly falls apart
You see your mother's face
You feel her pounding heart
And you call for her name to ascend with grace

Most days you feel all alone
So you kill yourself for recognition
You gotta fade in and fade out oh

You forgot to take it slow
And you fantasise a crucifixion
You gotta fade in and fade out oh

Yeah I know
We all try too much, too fast now
We lose control

But you should know
I'll be here waiting for you
When you've lost your soul, your soul

Most days you feel all alone
But you are not the only deviation
You gotta fade in fade out oh

You forget to take it slow
Yeah you are children of your generation

You gotta fade in fade out oh
You gotta take it slow
You gotta fade in fade out oh

You gotta take it slow
You gotta fade in fade out oh
You gotta take it slow
