ARSADI - Set Fire To Me

Let me feel, the heath on your skin
Keep on teasing me don't let me in, oh no no
Show me how, it's your way or the highway
Guide me to your love play, just say and we'll begin

Let me sense, the mist of your grace
If you keep it in it will be chased, I promise you
I'll search for the corners where your soul is
I really wanna know this
Just show me touch and pace

Go seek, go search and you might find
Go low, go high, we'll reach the sky

I'm gonna have, a tease for your kiss
But I'll surrender when you move like this, yeah you know
You could be, my pupil and my teacher
My darkness and my preacher, my curse and my bliss

I could give, you a head start if you want
We don't have to do it all at once
Guide me to your groovy
Show your secrets to me
How to move and how to bounce

Go seek, go search and you might find
Go low, go high and we'll reach the sky

Let me feel your fire
Set fire to me
'Cause when your heart's desire
To feel nothing but free
It's not about beauty, it's about touch
Don't ever think that you wanted too much
So set a little fire to me

Go seek, go search and you might find
Go low, go high, we'll reach the sky

Let me feel your fire, set fire to me
'Cause when your heart's desire
To feel nothing but free
It's not about beauty, it's about touch
Don't ever think that you wanted too much

Set a little fire to me
Set a little fire to me
Set a little fire to me
